

How to Use the Projector in the Macintosh Lab

Extron Control Panel

To project the screen of the Instructor's station:

1. Turn on the Instructor's station Macintosh
Note: You will need the username and password to use this computer.
2. To turn on the projector, go to the Extron Control Panel.
Hold down the Display Power button for a few seconds.
3. Press the button directly UNDER the Computer 1 button.
4. If you plan to play audio files, use the Volume control dial.

To play a video via the projector:

Note: The VCR is under the counter.

1. To turn on the projector, hold down the Display Power button for a few seconds.
2. Press the button directly ABOVE the VCR button.
3. Use the Volume control dial to adjust the volume.

To project the screen of your laptop:

1. Please ask for assistance from a staff member.
2. Be sure that the "Computer 2" button is selected.

For all uses of the projector: When you are finished, hold down the Display Power button for a few seconds to turn off the power. **Projector bulbs are quite expensive, so this step is very important!**
